- Operational Efficiency

## The Critical Challenges Facing Hospitality Brands

Hospitality brands today operate in a high-expectation environment where guests expect seamless experiences alongside strict data protection.

- 01

**Sensitive Guest Data Protection**

Identity documents and payment info mandate explicit consent and masking under India's new DPDP Act regulations.
- 02

**Fragmented Guest Ecosystems**

Data siloed across PMS, booking engines, and loyalty platforms prevents consistent personalization and timely service.
- 03

**High Service Inquiry Volumes**

Service teams face staffing challenges and the need for consistent quality across multiple properties and channels.

## What can Talisma do for You?

We've developed proven solutions across the entire institutional lifecycle, each designed to integrate seamlessly with your existing systems.

**COMPLIANCE WITHOUT DISRUPTION**

### DPDP for Hospitality

Automate consent, PII masking, and audit tracking for identity documents and payment info while staying compliant with India's DPDP Act.
