# The Critical Challenges Facing Higher Education

Institutions spend 50% of their time on manual processing and administrative overload, limiting visibility into student outcomes.

- 01Manual Admissions Bottlenecks
- Lower application-to-enrollment conversion due to generic communication and document verification delays.
- 02Fragmented Learning Ecosystem
- SIS, LMS, and assessment platforms lack integration, hiding critical insights into student progress.
- 03Employability Outcome Pressure
- Institutions are judged by industry relevance and placement rates, needing better skill-to-market mapping.

## What can Talisma do for You?

We've developed proven solutions across the entire institutional lifecycle, each designed to integrate seamlessly with your existing systems.

FASTER, SMARTER, STUDENT-CENTRIC

Admissions Automation

Digitize the entire lifecycle with automated document verification, AI applicant scoring, and predictive analytics.
